<sup>1</sup>The Industrial Waste Discharge Permit does not apply to restaurants, but does not exempt restaurants from Excessive Strength Surcharge fees for excess waste strength, or any required laboratory testing, or the need to install and maintain grease traps as outlined in the District's rules and regulations.

**Excessive Strength Surcharge Rates**

Excessive Strength Surcharge Rates shall be applicable to all industrial and commercial users who generate wastewater which contains any nonconventional pollutants or strengths of Carbonaceous Biochemical Oxygen Demand (CBOD<sub>5</sub>), Total Suspended Solids (TSS), Ammonia (NH<sub>3</sub>), or Total Phosphorus that exceed the system average strengths listed in the table below, as determined by special laboratory analysis by a certified laboratory. Other special service rates shall be charged on a case-by-case basis for toxic pollutant discharges, with the charges being based on the difficulty of treating the toxic pollutant as well as sampling, testing, and disposal charges. Strength charges are to be computed on actual measured strengths and volumes on monthly basis.

Excessive Strength Surcharge rates shall be calculated from the number of pounds delivered to the treatment plant in excess of the concentrations and at the cost per pound listed below:

| Constituent       | Concentration Limit | Surcharge cost per pound |
|-------------------|---------------------|--------------------------|
